**Tombstone Desert is water research hub**

By Dana Crudo

For many, the monsoon season is a weather change to look forward to in Arizona, but for a group of scientists collecting data on the Tombstone Experimental Watershed, it’s the best time of the year.

The Walnut Gulch Experimental Watershed in Tombstone has research from around the world who study the impact rainfall has on water runoff and erosion of soils and waters. This monsoon season, which runs from June to September, is the prime time for research.

"Tombstone is a perfect example where summer monsoon rains occur almost every year," said John Smith, supervisor of hydrologic technicians at Walnut Gulch. "Many researchers have collected data during the monsoon season, which is known for high-intensity rainfall.

During the summer monsoon season, the area receives high-intensity rainfall, which can result in increased soil erosion, water runoff, and decreased water quality," said Smith. "This is when many scientists take advantage of the monsoon season to conduct their research and gather data for future studies."
Ear House and Gallery offers history, art

By Pliskiha Peterson

The combination of history and fine art within the adobe walls of the 89-year Ear House and Gallery makes this residence a worthwhile and unique stop in Tombstone. Inn-Allen purchased the historic property in July 2003 intending to restore it to its natural state. He relied on historical documents, maps and photographs as reference in its reconstruction.

The Ear House is likely the finest of the old adobe ranches and homes in the area. It is called the Ear House because the family of Ear's immediately surrounding the property was named Ear. The property was owned by the Ear family from the 1880s until the 1960s.

The Ear House has been a gathering point for the Tombstone community for years, and it is now being restored by the Inn-Allen.

One of the visitors to the Ear House is Emily Kraft, the editorial page editor of The Tombstone Epitaph. She said that it is very much a part of Tombstone's history and is a place to come and learn about history.

Andrea Rivera, the art critic, said that the Ear House is a very important part of Tombstone's history. It is the place where many people come to learn about the history of Tombstone and see the artifacts from the past.

But the Ear House is not just about history. It is also a place where people can come to relax and enjoy the natural beauty of the area.

There are many other reasons to visit the Ear House, but the most important one is to learn about the history of Tombstone and the Ear family.
